# Foreword

The auto parts business is growing in Nigeria and Indonesia has lots chance to improve. According to Nigeria's Vice President, the country's annual vehicle demand is 720,000 units and local production is only able to supply 14,000 units. Therefore, importation (mainly of used cars) have continued to fill the supply shortfall. The NADDC said the country spends about \$8 billion each year on imported vehicles. Although automobiles and related components are not on the Central Bank's list of 45 products ineligible for foreign exchange, the difficulty assemblers face obtaining foreign exchange has led to increased prices and reduced consumer demand. Corporate organizations, the largest buyers of new vehicles, have reduced or postponed purchases, thereby extending the replacement cycle of their fleet from four to seven years.

If we look the fact in the street, Japanese brands dominate the new and used vehicle market, controlling almost a third due to their perceived reliability among consumers. In addition, the growing number of used cars in Nigeria is driving demand for spare parts.

A report by PWC indicates that the growth of companies with products and services supporting auto assembly will improve Nigeria's chances of becoming an automotive hub and provide more economic activity. Progression from basic semi-knock down (SKD) assembly to complete knock down (CKD) or manufacturing is highly dependent on growth of auxiliary industries and supporting infrastructure such as electricity. Therefore, building capacity for components such as batteries, belts, lights and tires is key for the success of Nigeria's auto policy. In addition, there are existing gaps in repair, which will become even more obvious with increased local manufacturing.

As for International Exhibition there are West Africa Automotive Show in May 17 – 19th and Lagos Motor Fair and Auto Parts Expo in May 9 -14th that showcase supply and need of the sector.

Finally with this book of catalogue, Indonesian Trade Promotion Center Lagos will continue to support and promote Indonesian auto parts products to business partners here in Nigeria.

Sincerely,

**Hendro**  
*Director ITPC Lagos*

## ACCU-Astra Autoparts

PT Astra Otoparts Tbk (AOP) is a subsidiary of Astra that completes the total automotive value chain in its role as the manufacturer and distributor of automotive components for vehicle manufacturer and retail consumers in Indonesia and other countries through a network of 56 business units, subsidiaries, associates and joint ventures. AOP shares are listed on the Indonesia Stock Exchange with market capitalization of Rp6 trillion at the end of 2019. Astra Otoparts is committed to aligning manufacturing capabilities to Industry 4.0, reflected by the presence of the business unit Winteq (Workshop for Industrial Equipment) as a pioneer in the implementation of smart factory and the appointment of PT Akebono Brake Astra Indonesia as a lighthouse candidate of Industry 4.0 implementation in Indonesia.

## Products and Services:

AOP fulfills the need of various components and spare parts for four-wheeler and two-wheeler vehicles, including electrical, engine, body and chassis, and power train products. AOP has a variety of well-known product brands that embody with leading quality standards, among others Aspira, Federal and various manufacturers-related brands such as GS Astra, Kayaba, and SKF.

## Production Facilities:

In order to meet customer demands for production requirements, both in terms of appropriate volume and product variety, AOP applies production standards that prioritize advanced processes and technology as well as careful production scale planning to achieve a competitive cost structure and productivity. AOP also establishes a regional track record by investment in two automotive component companies in Vietnam and a joint venture in China. Further, it is also an honor for AOP to receive acknowledgment from the Ministry of Industry for PT Akebono-Brake Astra Indonesia being selected as the light house candidate of Industry 4.0 implementation in Indonesia.

# ACCU-INCOE

INCOE battery is a reputable brand battery manufactured by PT Century Batteries Indonesia with PT. Astra Otoparts Tbk as the sole distributor. The INCOE battery brand has been internationally recognized in over 40 countries worldwide.

## SINGLE DISTRIBUTOR – PT. Astra Otoparts Tbk.

PT Astra Otoparts Tbk is a leading group of companies engaged in manufacturing and distributing automotive parts, serving below market :

As a leading group of companies, we constantly develop our manufacturing technology capabilities through strategic joint ventures as well as technical assistance agreements with automotive component manufacturers from Japan and Europe.

Our subsidiary companies' products are widely applied in car and motorcycle original manufacturers, such as Toyota, Daihatsu, Isuzu, Mitsubishi, Suzuki, Honda, Yamaha, Kawasaki and Hino.

With 25 years of expertise in distribution network, the INCOE battery has wide coverage and customers can find the products easily throughout Indonesian market.

## PRODUSEN – PT. Century Batteries Indonesia

PT Century Batteries Indonesia (CBI) is an affiliated company of PT Astra Otoparts which engages in lead acid battery industry with brand name of INCOE for automotive 4 wheeler vehicles as well as non-automotive application.

CBI products are divided into two categories: four-wheeler vehicles consisting of conventional, hybrid and maintenance free batteries while non-automotive batteries consisting of batteries for golf carts and deep cycle maintenance free batteries for lamps, solar panel and UPS.

Currently, CBI products have been marketed for domestic and export markets to Asia, Australia, Europe, Middle East to Africa. Standard reference of CBI products are:

- SNI (Indonesian National Standard)
- JIS (Japanese Industrial Standard)
- DIN (Deutsches Institut für Normung)
- AS (Australian Standard)

CBI implements a documented quality management system ISO 9001: 2008, so that consistency of customer satisfaction embodiment is more systematic, maintained, and developed. In carrying out its activities CBI continuously strives to improve environmental performance, safety, and occupational health as well as the concern of its employees by implementing ISO 14001: 2004 and SMK3 management system.

MAINTENANCE FREE | calcium

**DUPLEX LID ACID**  
The Dual Layer cover with improved labyrinth circulation system and integrated flame arrestor to compress water loss to the lowest level.

**FULL FRAME CALCIUM-LEAD RADIAL GRID**  

- Calcium / Calcium Alloy grid performs solid and flexible structure leads to supreme durability.
- Full frame radial design built for optimal current flow and faster charge acceptance and minimizing puncture side effect.

**ULTRA HIGH MOLECULAR WEIGHT POLYETHYLENE SEPARATOR**  

- High puncture resistance and induce oxidation stability to meet the range of ambient temperature and durability in HOT temperature usage.
- Very low electrical resistance.
- Enhance Cold Cranking Amps significantly.

**GLASS MAT SEPARATOR**  
High resistance against vibration, leading to a heavy duty battery usage.

# CAR PANTING-BELKOTE

Founded in 2006, PT Bintang Chemical Indonesia is one of the fastest growing mid-size Paint and Coating manufacturer in Indonesia. Envisioned to be the most innovative paint and coating company in Indonesia, we are trusted on having high quality product with high standard and consistency, supported by innovative research and development as well as lean manufacturing system.

Initially focused on wood coating segment, in 2016, we saw potential growth opportunity in automotive refinish, metal and plastic coating due to the growth of mid-size community, which uses car and motorcycle as their secondary needs as well as the growth of infrastructure built up in Indonesia. This shifting embraced us to be a significant player in Indonesian automotive refinish market.

Dedication of our loyal human capital is one of the main key success of our incremental growth. We are building a culture of friendship, transparency, innovation and eagerness to do continuous improvement so that our human capital feels their work environment as their second home. We value our suppliers in a mutual, win-win partnership. We realize in this rapidly changing world, the partnership with our suppliers is essentially important. Without them, we would not be a leader in innovation as well as maintaining our competitiveness. We are proud by the engagement of more than 20 distributors all over Indonesia. Growing and developing market together as business partners.

Owing those capitals are building up our confidence to be positioned as a leader in Indonesian paint and coating industry. Tag lined as: "we grow, you grow", we are looking forward to work together with you.

# TYRE-MULTISTRADA

TIRE YOU CAN TRUST

PT Multistrada Arah Sarana Tbk. up until now has developed two brands of vehicle tire products, which are Achilles and Corsa. Achilles is a brand of car tire that is able to be used by Passenger Car type, Sport Utility Vehicle (SUV) and Light Truck with Steel Belted Tubeless type. And Corsa is a brand of tire for two wheeled vehicles.

PT Multistrada Arah Sarana Tbk or known as MASA (the Company) is an Indonesian tire manufacturer, that was prior known as PT Oroban Perkasa pursuant to Limited Company Entity Establishment Deeds No. 63 of 1988. The Company produces tire for fourwheels and two-wheels vehicle under our own brands (Achilles and Corsa) and off-take, covering domestic and export marketing area.

In its early years, the Company made use of its vast factory areas and modern technology, and it also directly received technical assistance in the form of design and distribution from Pirelli-Italy and Continental GmbH-Germany.

The year 2019 marked a significant change for the Company. It was during this year that the Company received a notification from the Controlling Shareholders on January 22, 2019. The notification informed the Company that the Controlling Shareholders, together with other shareholders of the Company and Michelin, had made and signed an Agreement for the Sale and Purchase of an Interest in PT Multistrada Arah Sarana Tbk.

Following up on this agreement specifically, on March 6, 2019 an acquisition of 87.59% of the Company's shares was done by Compagnie Générale des Etablissements Michelin (hereinafter briefly referred to as "Michelin"). The acquisition of shares continued with a Tender Offer, with a share purchase of 1,106,844,271 shares. As a result, Michelin's ownership in the Company was 9,149,766,702 shares (99.64%). With this acquisition made by Michelin, the Company is still in the process of transitioning from its old management to a new management under the auspices of Michelin.

# ACCU-Selatan Jadi Jaya

PT. SELATAN JADI JAYA is one of the leading automotive battery manufacturers in Indonesia. The company was established in 2005 and is located in Sidoarjo, Indonesia. Since 2007, the company, through its large investments, has grown to become one of the most big players among automotive battery manufacturers in the world. PT. SELATAN JADI JAYA spread its wing to differ its division to fulfil the market demand of automotive batteries. PT. SELATAN JADI JAYA spearheaded the manufacturing of Maintenance Free battery in Indonesia with high quality not only for car but for all range of automotive vehicles and lighting. To become the first independent company, PT. SELATAN JADI JAYA has developed all the lines to be integrated to support the fast, efficient and effective production line from raw material up to finished good. With this support, customers will receive their goods more earlier than usual expectation.

## Product:

**PT. SELATAN JADI JAYA**

*product range*

**Low Maintenance Battery (Conventional Battery)**  
 Reliable value of dry charged low maintenance battery. The battery is supplied without acid liquid. Once it is filled with acid water, the battery is ready for use. As it is low maintenance, the user need to check the liquid level regularly to maintain the liquid level in order to get maximum life span of the battery.

**Hybrid Maintenance Free Battery (Open Cap)**  
 Hybrid Ca+ technology - Ca (negative electrode) and Sb (positive electrode), providing lower gas formation and ability to withstand deep discharge. Battery is filled with acid liquid and very easy to maintain. No need add acid liquid frequently.

**Scaled Maintenance Free Battery**  
 Calcium technology providing lowest gas formation and self discharge. Battery is already with acid liquid inside and sealed. No need for any maintenance, no need to add acid liquid.

**Product Usage Range**  
 Car Battery  
 Truck & Marine Battery  
 Motorcycle Battery  
 Lighting Battery
